leaders in living space design

**cabinetry** is defined by precision, quality and functionality. each component that makes up a blu\_line cabinet has been thought through; from the machined 1mm edging to the solid cabinet backs and finally to the custom laminate interior, providing the essential aesthetic element. all blu\_line cabinets display expert planning, state-of-the-art technology and 21st century craftsmanship, creating durable and unrivalled cabinet quality.

**care** must be taken with all finishes and for the custom interior laminate use a non-abrasive damp cloth followed by a non-abrasive dry cloth. use only a mild, non-abrasive detergent if necessary.

**systems** speak to the solutions that have been developed by blu\_line in order to create not only relational but functional products. blu\_line has adopted the blum drawer, hinge and lift systems which boasts soft-close functionality as well as aesthetic appeal. all drawers are full extension, with the deep drawers tested to support a weight of up to 50kg, and boast non-slip rubber matting in the kitchen and bathroom setting. stainless steel inserts are used in the kitchen and bathroom for functional use of internal space and custom wooden inserts in the bedrooms .

**care** must be taken with all finishes. if you experience any difficulties with any drawer, hinge or lift mechanisms, please book a service call with the technical services department. see back of booklet for contact details.

**worktops** form a critical part of the overall design and blu\_line strives to offer surfaces that are both practical but at the same time engage with the rest of the interior.

**engineered quartz stone** is a highly durable and practical surface that is both scratch, stain and heat resistant - to a degree - offering many colours that will enhance the overall design.

**care** must be taken with all finishes and for engineered stone surfaces, use a non-abrasive damp cloth. only use a mild detergent if necessary. never use abrasive products or aggressive products such as bleach. ensure that the counter is wiped completely dry after spills and cleaning to ensure an even finish.

**granite | marble | concrete** are natural products that offer varied grain and different textures but can be prone to staining.

**care** must be taken with all finishes and granite, marble and concrete require a non-abrasive damp cloth only. refrain from using detergents of any kind to avoid marking and be sure to wipe evenly.

**glass** worktops are toughened and therefore ensure the safety of the user making it a viable option for certain design elements.

**care** must be taken with all finishes and for glass, use a good quality window cleaner and a non-abrasive cloth. be sure to apply evenly to avoid marking. ensure that the glass is wiped completely dry after cleaning to ensure an even finish.

**stainless steel** is a very hygienic surface but is prone to scratching, which in certain settings adds character to the scheme.

**care** must be taken with all finishes and for stainless steel, use good quality stainless steel cleaner. once again refrain from using abrasive products. clean following the grain of the steel.

**corian** is an acrylic material that can be moulded into any shape or form and is extremely hygienic.

**care** must be taken with all finishes and for corian surfaces, use soapy water, ammonia based cleaners. stubborn residue will require a little stronger cleaner. ensure that the counter is wiped completely dry after spills and cleaning to ensure an even finish.

**finishes** define the overall design and is therefore essential that all materials used are timeless in appeal, neutral in colour and above all exceptional when it comes to aesthetic appeal and functional relevance.

**lacquers** in either a matt, gloss or metallic finish applied by automated state-of-the-art machinery guarantees not only a practical surface but striking beauty as well.

**care** must be taken with all finishes and for high gloss or matt lacquers use a non-abrasive damp cloth followed by a non-abrasive dry cloth.

**do not use** detergents on high gloss or matt lacquers and never use abrasive products of any kind.

**timbers** used are carefully selected for their aesthetic, practical and timeless appeal and can be used in either a veneer or solid state; timbers are sourced locally and abroad. certain veneered timbers go through a reconstruction process enabling a more even grain and consistent colour enabling a more contemporary look.

**care** must be taken with all finishes and for timbers use a non-abrasive damp cloth followed by a non-abrasive dry cloth.

**do not use** furniture polish, oils or detergents and never use abrasive products of any kind.

**glass** offers a wonderful texture and brilliant reflection. where necessary, glass used is toughened, making for a safe and durable product. our frosted glass is treated with a clearshield coating ensuring a fingerprint-resistant finish.

**care** must be taken with all finishes and for glass, use a good quality window cleaner and a non-abrasive cloth. be sure to apply evenly to avoid marking.

**laminates** in a matt, high gloss or woodgrain finish all boast durability, beauty and a wide range of colours.

**care** must be taken with all finishes and for laminates use a non-abrasive damp cloth. only use a mild detergent if necessary.

## terms and conditions

the seller's workmanship guarantee is a commitment to the purchaser that any problem that is caused directly by poor workmanship of the seller as installer will be rectified without undue delay within a 10 year period based on the conditions below.

the seller's product guarantee is a commitment to the purchaser that any defects will be rectified without undue delay within a 7 year period based on the conditions below.

**1/** both guarantees exclude water damage or damage caused by negligent use, attempts at self repair/ modification, or any other act or omission which could be considered unreasonable on the part of the purchaser as determined by the seller.

**2/** in the case of other products supplied to the purchaser by blu\_line, which are not manufactured by blu\_line, the relevant manufacturer's conditions will apply.

**3/** the free replacement of any part will not include reimbursement for any and all damaged related or connected to such replacement.

**4/** these guarantees do not cover damage or defect resulting from product exposure to unreasonable temperatures or conditions which will include direct sunlight exposure. ordinary wear and tear in materials will not be considered a defect in workmanship or materials.

**5/** in the event that the installation address is further than 100km from the location address of the seller, travel and accommodation costs may be payable by the purchaser.

**6/** this guarantee is transferable in respect of the balance of the guarantee period remaining on the date of sale of the property on which the goods were installed.

blu\_line disclaims any and all liability, whether directly or by way of indemnity, for special, incidental, consequential, or other damages, whether based on breach of contract, tort, strict or product liability, patent of trademark infringement or any other legal theory.
